Bài 2:

```
abstract class Shape {
    abstract void draw();
    public String getColor() {
        return "Red";
    }
}
class Rectangle extends Shape {
    @Override
    void draw() {
        System.out.println("Drawing Rectangle with
                    color " + ~~Rectangle~~
                        getColor());
    }
}
class Circle extends Shape {
    @Override
    void draw() {
        System.out.println("Drawing Circle with
                    color " + getColor());
~~class~~
public class ShapeApp {
```

Ngày .....tháng .....năm.....
